

1500W Trio Laser with YAG V5

Trio Laser V5 is the 2 in 1 multi-function laser beauty platform. The powerful machine combines the benefits of 755nm 810nm 1064nm diode laser hair removal and YAG laser tattoo removal. The improvement in the efficiency by more than 400% and immediate hair removal effect is achieved by collimated laser which makes the energy more concentrated. It is the most cost-effective multi-function laser beauty machine on the market to meet almost all requirements of a beauty clinic.

Applications

- Diode laser hair removal.
- Removal of superficial vessels.
- Non-ablative laser rejuvenation.
- Tattoo removal
- Acne treatment

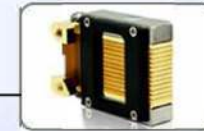

Benefits

- Multi-purpose machine by combining three wave laser diode and YAG laser
- Permanent hair removal by three waves German diode laser
- Pigmentations treatment (Spots removal, smallpox removal, freckle removal)
- All colors of tattoo removal
- Eyeline, eyebrow pigments removal
- User friendly software
- Long life of the diode laser using the advanced technology of German micro-channel cooling chips

Diode laser handpiece

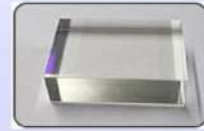

International Golden standard micro channel laser

Push button

Vacuum magnetron sputtering 2.0 laser guide no energy loss

4D Sapphire

The same annular TEC cooling as alma, speedal cool SCT

Water board

Handpiece shell

Counting board

Specifications

Machine	V5	
Handpiece	Alpha-IV	
Laser	Diode laser	Nd:YAG
Wavelength	755nm+808nm+1064nm	532/1064nm
Pulse width	10-400ms	20-30ns
Optical power	1200W	500W
Spot size	15mm×25mm	1-10mm adjustable
Max fluence per spot size	1-120J/cm ²	1000mJ/cm ²
Max repetition rate	1-10Hz	1-10Hz
Skin Cooling Temperature	-5°C--5°C	
Skin cooling system	Hitech Freon Compressor Cooling+Air cooling+Water cooling+TEC	
Electrical	100-240VAC, 50/60Hz	

Nd:YAG laser handpiece
