Water Mesotherapy Gun

Mesotherapy is a permanent and non-surgical method for removing fat, contouring the body and is also used for hair loss and skin aging. The purpose of mesotherapy is to rejuvenate, tighten, remove excess fat and regenerate the skin by injecting hormones, vitamins and plant extracts. Mesotherapy nourishes and rejuvenates the skin by producing collagen and elastin. Recently, with the discovery that body fat can be reduced by injecting certain substances, mesotherapy is widely used for weight loss, cellulite reduction, body sculpting, wrinkle removal and facial rejuvenation.

Technology

The technique involves the injection of certain substances, via a very fine needle, underneath the dermal layer of the skin into the subcutaneous fat tissue in the area selected. The combination of substances injected depends on the concoction prepared by the practitioner or 'mesotherapist'. It may contain minute quantities of plant extracts, vitamins, enzymes, nutrients, hormones and medications such as vasodilators, non-steroidal anti-inflammatory agents, beta-receptor agonists and antibiotics. Claims of the benefits of dermal injections of hyaluronic acid, antioxidants, dimethylaminoethanol, procollagen peptide, silicon, minerals, coenzymes, amino acids and multi-vitamins include improved elasticity, collagen synthesis, radiance, circulation, homeostasis, micro-exfoliation, skin thickness, hydration and skin softness. Handpiece

RF PROBE The RF transmitter module on both side of the probe can continuously transmit RF microcrystals to the skin, which can produce 40-60° temperature on the skin surface, so that the skin pores can be quickly opened, and the skin beauty products quickly penetrate into the skin cell layer following the channel. NCIPLE intained

Functionality

Benefit

- Rejuvenate and prevent wrinkles
- lighten pigmented skin
- Fade facial lines
- Tightening the skin
- Removal of excess fat in the skin, of the stomach, buttocks, thighs, face
- Reduce fat accumulation
- Treating a disease that causes hair, loss called alopecia
- Removal of cellulite
- Fix dark skin spots
- Eliminating fatigue
- Rose skin
- Improve damaged skin

RS rejuvenation-01	
Parameters	Quantity
Type	Water Mesotherapy Gun
Multi-needle	5needles, 9needles
Mode	Low speed/ High speed/ 10-250 times/min
Injector capacity	1ml, 2ml, 5ml
Advantage	Single needle, multi needle, vacuum, 3 in 1
Vacuum flow	25L/min pressure:90Kpa
Two modes	Single mode and continuous mode
Depth	0.3-4.5mm
Vacuum	1-4pa
Speed	1-6s
Dose	4-64μl
Display	4.3 inch LCD touch screen
Power	50W
Voltage	220V, 50Hz
DA	12V/5A
